

# Learning Design Sequence

products of the AuTC project on ICT-based learning designs

## Real Life Cases in Multimedia

### Intended Learning Outcomes:

- Enhance understanding of the design, process and project management issues that arise in multimedia product development.
- Have the ability to design and develop interactive multimedia packages in collaborative teams.
- Develop an understanding of the roles and responsibilities of the members of a multimedia development team.
- Reflect on the team experience and articulate the lessons that can inform future practice.
