

Learning Design Sequence

products of the AUTC project on ICT-based learning designs

Natural Resource Management

Intended Learning Outcomes:

1. Review and think critically about the information on the content areas in question.
2. Demonstrate that you can access up to date, relevant and informative information about the content areas in question.
3. Read and think about the information you have collected and form your own opinion and questions.
4. Demonstrate that you do not accept data at face value and can decide on its reliability and worth.
5. Report your findings in a manner that can be understood by a wide audience.
6. Reflect on your own learning arising from the process of writing the answer.
